

88 Speedmart System

Final Written Report Quality Assurance & Submission Guide BMCS3183 Advanced Database Management

1. Strict Formatting & Typography Specifications

Requirement	Specification in Assignment Brief	How to Verify in MS Word (.docx)
File Format	MS-Word (.docx) only	Do NOT submit raw PDF or ZIP for the main report.
Paper Size	A4 (210 mm x 297 mm)	Layout → Size → A4.
Line Spacing	Single spacing (1.0)	Paragraph → Line Spacing: 1.0 (0pt before/after).
Body Font	Times New Roman, 11pt	Standard body text across all explanatory paragraphs.
Code Font	9pt (Courier New or Consolas)	All SQL queries, DDL, procedures, triggers, and reports.
Headings	Arial or Times New Roman (Bold)	Heading 1: 16pt, Heading 2: 13pt, Heading 3: 11pt.
Page Numbers	Numbered except cover page	Bottom center/right; use <i>Different First Page</i> .
File Naming	TeamName (TeamNo - Group) - Names.docx	Example: MON0800RMXH (Team 1-RSW2S3G5) -Alice-Bob-Cat.docx
Drive Upload	DO NOT UPLOAD IN ZIP FILE	Create team folder + individual member script subfolders.

2. Required Report Chapter Structure

Report Chapter	Required Contents & Deliverables
Front Matter	Cover Page, Signed Coursework Declaration, Table of Contents, Table of Figures.
Chapter 1: Scope	88 Speedmart system background, core modules, and selected Module 3 (Refund/Return).
Chapter 2: Task 1	Complete 3NF ERD diagram, 33 business rules, and 6 core system assumptions.
Chapter 3: Task 2	22 Normalized table DDL definitions with integrity constraints (PK, FK, CHECK, NOT NULL).
Chapter 4: Task 3	2,816 Sample records table volume summary, multi-year date spread (2022–2027).
Chapter 5: Task 4	10 Analytical Queries (2 per student) with Strategic/Tactical business value & screenshots.
Chapter 6: Task 5	10 Stored Procedures (2 per student) with transaction logic & execution/error screenshots.
Chapter 7: Task 6	10 Conditional Triggers (2 per student) with WHEN conditions & rejection screenshots.
Chapter 8: Task 7	10 Reports using Parameterized Nested Cursors (8 marks+ tier) with ASCII output screenshots.
Chapter 9: Task 8	Extra Efforts: 1 Sequence, 2 Views, 2 Indexes, 2 Formatting, 2 Exception types per student.

3. Technical Documentation Pattern (Tasks 4 to 8)

For every Query, Procedure, Trigger, and Report, strictly follow this 4-step documentation layout:

Step 1: Student Attribution — e.g. *Developed by: Alice Ng (24WMR01234) • Module 1*

Step 2: Business Rationale — 2 to 3 sentences explaining the operational or decision-making need for 88 Speedmart.

Step 3: Source Code — Formatted SQL / PL/SQL script in **9pt font** with clear inline comments.

Step 4: Execution Output Screenshot — High-resolution screenshot captured from Oracle SQL Developer / SQL*Plus.

4. Screenshot & Verification Checklist

- **Task 4 Queries (10 screenshots)**: Captured tabular output with column headers, formatted numbers, and row counts.
- **Task 5 Procedures (20 screenshots)**: 10 screenshots of successful execution () + 10 screenshots showing custom exception triggering (e.g., ORA-20001, ORA-20404).
- **Task 6 Triggers (10 screenshots)**: Attempted illegal INSERT or UPDATE showing trigger aborting transaction with custom message.
- **Task 7 Reports (10 screenshots)**: Complete ASCII layout report generated via DBMS_OUTPUT.PUT_LINE showing headers, line items, and totals.
- **Task 8 Extra Efforts (10 screenshots)**: Verified output for DESC ViewName, USER_INDEXES, sequence generation, and PRAGMA exceptions.

5. Top 5 Submission Pitfalls & Examiner Checks

- **1. No ZIP Files Allowed**: The assignment brief explicitly instructs not to upload in zip files. Submit the .docx report and .txt scripts directly into the team Google Drive folder.
- **2. Missing Individual Contribution Labels**: Ensure each team member's name and student ID are clearly stated next to their respective Task 4–8 deliverables.
- **3. Cursor Level Scoring**: In Chapter 8, explicitly state that **Parameterized Nested Cursors** were implemented to qualify for the highest rubric tier (**8 marks+**).
- **4. Font Consistency**: Keep all body text in **11pt Times New Roman** and code in **9pt font** throughout all chapters.
- **5. Single-Spaced Format**: Ensure entire report uses 1.0 line spacing with proper page breaks separating major chapters.
